

HiPOP

High Performance Computing Opportunities

The vision is for a portal on high performance computing (HPC) and computational sciences and engineering (CS&E) that

- raises public awareness and engagement among youth worldwide,
- provides access to high quality materials and mentoring,
- stimulates creativity via global collaborations among students, educators, and practitioners

Community Needs Driven

Input and advice by students from the consortium institutions.

- Objective is to discuss best practices for the web portal
- Consultation and feedback on the evolving design of the portal

Input and advice by professionals and project leaders from Institutions organizing activities to promote CS&E/HPC via the HiPOP survey

- Objective is to gather information for the design of the web portal
- Results available at www.hipop.cyi.ac.cy

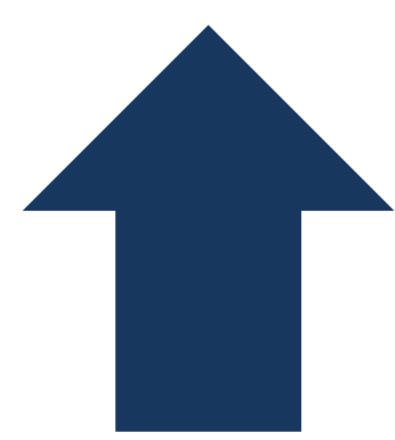

HiPOP Educational Portal www.hpc-education.org

High Quality Material:

- Training/Tutorials
- Seminars, Events Conferences
- Educational opportunities and Internships
- Simulation tools for learning science

Society:

- Discussion Forums
- Social Network
- Wide audience of students, teachers and researchers

We need **your help** to enrich HiPOP with **high quality material**. This can be done through the HiPOP educational portal.

HiPOP Complements PRACE's objective to create a training portal

Outreach

The red dots mark the sites that responded to the HiPOP survey. The consortium partners are shown around the figure with arrows pointing to their locations
